**D: Reading passage ( ۲ ):** Read the following passage and **choose the correct answer.**

One of the environmental problems that are worrying me most is the pollution of the sea. I think that the pictures we saw recently on the TV news during Christmas holidays, still exist in our minds; sea pollution is mostly caused by releasing petrol or oil into the sea from big ships. The fact that every day a big part of the sea is destroyed from unlucky accidental happenings which occur all over the world should be a global concern.

We can predict that in half a century, there will be no part of the sea without pollution. As a result, fish which is one of the healthiest foods will be no longer suitable for people. In addition, many kinds of the seas' vital and natural resources will disappear. People won't be able to swim and entertain themselves at sea and so on.

Some possible ways to stop these misfortunes (unwanted happenings) to take place are: ۱) careful control of ships which carry dangerous things, ۲) all factories must clean their unwanted materials which are near the sea, and ۳) research must be done by scientists to find ways for cleaning the polluted parts.
